SUMMARY

B.Tech student in Electronics and Communication Engineering at NIET with a CGPA of 8.98. I have completed internships in Machine Learning at CodSoft and Full Stack Web Development at ShadowFox. For Smart India Hackathon 2026, I worked on a mine rescue AI system using a YOLO11n model on Raspberry Pi. I am interested in software development and machine learning.

EDUCATION

Bachelor of Technology, Electronics and Communication Engineering 2024 - 2028
Noida Institute of Engineering and Technology (NIET), Greater Noida | CGPA: 8.98/10 | 2nd Year YGPA: 9.20
Subjects: Data Structures and Algorithms, Operating Systems, DBMS, Computer Networks, Digital Electronics

Class XII (CBSE, Science), Himalayan Residential School, Bikram, Patna: 70.2% 2023
Class X (ICSE), St. Paul's High School, Digha, Patna: 88.5% 2021

TECHNICAL SKILLS

- **Languages:** C++, Python, C, Java, JavaScript, Verilog
- **Frontend:** HTML, CSS, JavaScript, React.js
- **Backend:** Node.js, Express.js, MongoDB, REST APIs
- **Machine Learning:** Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, NLTK, OpenCV, YOLO11, NLP, Computer Vision
- **Core Subjects:** Data Structures and Algorithms, OOP, Operating Systems, DBMS, Computer Networks
- **Embedded and EDA:** Raspberry Pi, Arduino Uno, STM32, Keil, Proteus, Vivado, KiCad, CST Studio Suite
- **Tools and Cloud:** Git, GitHub, Oracle Cloud Infrastructure (OCI), MS Excel, Word, PowerPoint

INTERNSHIPS

Full Stack Developer Intern, ShadowFox (Online) Oct 2026
- Made a personal portfolio website using HTML, CSS and JavaScript, and learned the basics of Node.js.
- Built a website for a dental clinic client (Sakthi Dental Clinic) with Home, About, Treatments, FAQ and Contact pages.
- Added a contact form with validation for required fields and email format, and made all pages responsive for mobile.

Machine Learning Intern, CodSoft (Online) Jul 2025
- Built a customer churn prediction model on 10,000 bank customers and compared 6 models (Logistic Regression, SVM, KNN, Decision Tree, Random Forest, Gradient Boosting). Gradient Boosting gave the best accuracy of 86.7%.
- Made a credit card fraud detection model on 1.85 million transactions where only 0.5% were fraud. Created new features from date and time columns, and the Decision Tree model got 99.8% accuracy with 0.82 F1-score on fraud cases.
- Built a movie genre classifier on 54,000+ plots in 27 genres using NLTK, TF-IDF and Multinomial Naive Bayes.
- Did EDA with Matplotlib and Seaborn and checked models using accuracy, classification report and confusion matrix.

PROJECTS

MARS - Mine Rescue AI System (Smart India Hackathon 2026) 2026
- Fine-tuned a pretrained YOLO11n model for 50 epochs on 12,440 labelled images with 6 classes (person, fire, smoke, small vehicle, large vehicle, two-wheeler) and got 82.2% mAP50, 81.3% precision and 79.6% recall.
- Ran the model on a Raspberry Pi and built an HTML, CSS and JavaScript dashboard that fetches data from the Pi.

Shopping Kart (Python, OOP) Jun 2025
- Made a console cart app with Product, Cart, User and Order classes using encapsulation, inheritance and polymorphism.

DRA-Based MIMO Antenna Design (CST Studio Suite, KiCad) Ongoing
- Designing a dielectric resonator antenna based MIMO system and checking S-parameters, gain, bandwidth and isolation.

ACHIEVEMENTS

- Technical Head of Aerobots Club, ECE Department, NIET Greater Noida.
- Participated in Smart India Hackathon (SIH) 2026 and received a certificate of participation.
- Presented the MARS project at the Capgemini Centre of Excellence inauguration at NIET.
- Participated in APT Young Professionals and Student Program (APTYS 2026) on "6G Road Map" by NCA-T.
- Solved 165+ problems on LeetCode.

CERTIFICATIONS

- Oracle Cloud Infrastructure (OCI) Foundations Associate (Oracle University), Gen AI 101 (Nasscom), Introduction to Cybersecurity (Cisco Networking Academy), Verilog for VLSI Design (Maven Silicon)
- **Infosys Springboard:** Python Programming, C Programming, C on Linux, DSA using Python (Part 1), Mobile Apps Development (Advanced), Internet of Things 201, IoT Raspberry Pi with Projects, Wireless Evolution and 4G LTE Overview, VLSI Digital Design and Verilog Programming, Express PCB Training
